

RETRACTABLE SCREEN STORM DOORS FEATURES CONTINUED

ALL CABRIO DOOR STYLES AVAILABLE IN WHITE, ALMOND
& SANDSTONE

7: Covered screen track – The edge of our screen is attractively hidden in a track. This track helps to hold the screen edge in place and gives a great looking interior appearance.

8: Operating sash bug guard – We have designed a barrier to restrict insects from coming around our sash. This barrier is effective in the open and closed positions.

9: Installation screw covers – All exterior installation screws are hidden with our snap in screw covers.

10: Easy screen cartridge replacement – In the event that a screen is damaged, we made sure that screen cartridges could be replaced easily without dismantling any major door parts.

11: Dual seal adjustable sweep on bottom expander – Our expander has three adjustable positions and 2 sweeps to ensure a tight fit on nearly any doorsill.

12: Durable kick panels – Cabrio doors with low or high kick panels are built with the strongest abuse panel in the industry. Our kick panels consist of 2 aluminum alloy sheets each bonded on both sides to a 7/16" thick oriented strandboard core.

Block and tackle balance – The sash slides up and down with a smooth and effortless operation without relying on the tension of the screen.

Interlocking hinges – Our hinges interlock into the doorframe, which insures perfect hinge alignment and superior strength against door sag.

Hardware Options

Cabrio Doors are available in two hardware styles. The Seville hardware is an elegant, lever style hardware with a keyed deadbolt. Seville finish options are brass, pewter and oil rubbed bronze. The Dakota hardware is an attractive, pull style hardware with a separate keyed deadbolt. Dakota finishes include brass, pewter and oil rubbed bronze. We also offer a painted Dakota pull style hardware with interior locking.

Quality since 1932

Our mission is to manufacture high quality, low maintenance storm doors that are fairly priced. Throughout our history we have established ourselves as an innovator in the design and manufacturing capability of top quality storm doors.

In fulfilling our mission, we blend new material technology and innovative manufacturing processes in order to provide unique designs and product offerings.

Online Information

For more information on additional storm doors styles such as our Classic and Uniquely Yours doors, please visit our website at www.gerkin.com.

The Gerkin Warranty

All Gerkin storm doors have a full repair or replacement warranty for as long as you own your home, covering door main frame, kick panels and hinges. Hardware warranty is one year (latch set, locks, operating and sash panels and closure assembly). For detailed warranty information, visit www.gerkin.com.

RETRACTABLE SCREEN STORM DOORS FEATURES CONTINUED

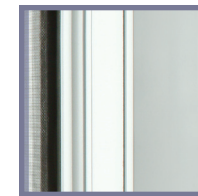

ALL CABRIO DOOR STYLES AVAILABLE IN WHITE, ALMOND & SANDSTONE

1: Retractable screen – Our screen retracts into the head of the door for clear viewing when ventilation isn't needed.

2: Automatic screen reset feature – The screen maintains a constant tight fit and will reset itself when pushed on.

3: 1-3/4" mainframe – This heavy frame is designed for strength with beautiful rounded features that give elegance to every door.

4: Heavy extruded aluminum corner gussets – Two engineered corner gussets are used for superior strength against twist or sag.

5: Heavy overlapping weather-strip – Cabrio doors overlap the z-bar with a heavy frame weather strip for a tight weatherproof seal.

6: Sash interlock – Our sashes will interlock together while in the closed position, which offers a weather tight fit.

RETRACTABLE SCREEN STORM DOORS

Gerkin Windows and Doors introduces a new generation of storm doors called Cabrio. The Cabrio is highlighted by a retractable screen, which is hidden away in the head of the door when ventilation isn't needed, thus giving a beautiful clear view!

The Cabrio is a newly designed door with beautifully rounded features outlining the 1-3/4" thick doorframe. This attractive (convertible) door offers an easy operating sash, which runs on a smooth block and tackle

balance system to ensure, effortless operation. The sash relies on the balances, not the screen, for operation! For protection against insects, the screen overlaps and seals the interior frame opening and has a sweep seal on the bottom of the sash. The screen will reset itself to the proper position if pushed or blown in.

A key component to the door is the retractable screen. This component is made by Gerkin to ensure quality workmanship for long lasting, reliable operation. The screen cartridge is easily replaced if needed without dismantling any major door parts.

This doors stylish new 1-3/4" door frame uses our time tested extruded corner gusset design found in all other Gerkin doors. We incorporate an additional inside corner key as well. The weather-stripped doorframe overlaps the z-bar frame for a secure and snug fit. All installation screws are covered by an attractive snap in cover, concealing all exterior screws.

The Cabrio is available in three attractive styles. The model 809 is a full view self-storing, the model 802 is self-storing door with a low kick panel and the 801 is a self-storing door with a high kick panel.
